

INTRODUCING THE WORLD'S LIGHTEST WEIGHT 5-CHANNEL CABLE PROTECTOR

Featuring the **NEW GRIPPER®** Connector System

GRIP GUARD® 5-CHANNEL CABLE PROTECTORS feature our patent-pending "Gripper® Connectors" with a new lightweight design. **At a weight of only 12.75 lbs, Grip Guard is up to 60% lighter than other leading polyurethane 5-channel cable protectors, and up to 75% lighter than other rubber 5-channel cable protectors on the market.**

The Gripper® Connector is ergonomically designed to fit your hand, which allows for easy handling and transport. This connector also locks multiple cable protectors together easily and tightly to provide a safe crossing for vehicle and pedestrian traffic while protecting valuable electrical cables and hose lines from damage.

This modular interlocking design is ideal for use in most public entertainment events, light commercial and utility applications where cable protection is needed. GRIP GUARD® CABLE PROTECTORS are made from maintenance free polyurethane. When compared to other rubber manufactured cable protectors, GRIP GUARD® is up to a 75% lighter without compromising the required strength and durability.

Protects cables and hoses up to 1.25" outside diameter

MODEL: GG5X125

The Gripper® Connector is a patent-pending design that is ergonomically designed to fit your hand, which allows for easier handling and transport.
